Lead-Free & Non-toxic – Our products are LEAD-FREE and safe for adults, children, and pets. Our products are analyzed and certified by a lab called Trace Analysis in Texas (<http://www.traceanalysis.com/>). We are happy to provide a copy of the Certificate of Analysis to show that there is no lead in our product (attached testing for Willow and Evernatural Classic).

Environmental – You will be helping the environment by saving water. California has experienced its' toughest droughts in the recent years and installing synthetic turf is a measure in water conservation.

Water Bills – No rising water bills and no sprinkler systems required.

Low Maintenance – Unlike traditional sod which needs constant care and is only in peak condition 50-75% of the year, synthetic turf is low maintenance and is green 100% of the year.

Durable – Unlike sod which is easily damaged, turf is built to survive the rigors of high traffic and aggressive sports play.

Life expectancy – 20-25 years under normal usage.

SAVE MONEY long term – You will spend more up-front, but you will save money in the long run by installing synthetic turf instead of traditional sod.
