## Mulch Special!

New year's special! 10% off when you buy more than 20 yards or 25% when you buy more than 40 yards of arbol mulch.

***Mulch helps improve soil moisture and prevents plants from drying out too quickly. Mulch helps reduce soil erosion and soil compaction. Mulch helps maintain optimal soil temperatures by creating a barrier from the heat and cold***

### Financing

- 3-month payment plan
- Credit card payment.
- Financing

### Pricing

- Price ranges from \$105 to \$135 per yard

## Benefits of having mulch

- Mulches suppress weed growth
- Mulches retain moisture - particularly helpful in hot summers
- Mulches reduce soil erosion – useful during winters and heavy rain
- Mulches can insulate crops from extreme temperatures – especially useful for early and late crops
- Organic mulches can rot down to provide soil nutrients and encourage beneficial soil organisms and worm activity

## Types of mulch

- Organic mulches include formerly living material such as chopped leaves, straw, grass clippings, compost, wood chips, shredded bark, sawdust, pine needles and even paper.
- Inorganic mulches include black plastic and geotextiles (landscape fabrics).
- Mulch with a variety of colors

***\*Offer valid for Arbor mulch only.. Green Vine Landscaping, Inc. will provide delivery of mulch at no cost after 20 yards.***
